# Abstract

Winee3, a cutting-edge SocialFi super-app, innovatively bridges the spheres of professional networking, event organization, and the dynamic world of Web3. Central to Winee3's mission is to facilitate meaningful professional and social connections in the Web3 community, enabling users to engage, collaborate, and grow in a thriving digital ecosystem. The app redefines event experiences by integrating NFT ticketing, offering unique, verifiable, and collectible access to a variety of web3-focused gatherings and discussions.

Events on Winee3 are more than just meetups; they are gateways to immersive experiences and learning opportunities in the rapidly evolving realms of blockchain, cryptocurrency, and NFTs. These gatherings range from casual networking sessions to high-profile conferences, all unified by the innovative use of NFTs for access and engagement

At the heart of user interaction within Winee3 is the $WNE Token. Users can exchange this token for Winee Points, facilitating various in-app activities and transactions. This token economy not only enhances the user experience but also drives ongoing participation, rewards, and a sense of community among members. As users engage with the platform, they contribute to and benefit from the sustained growth and vibrancy of the Winee3 Ecosystem.

# Introduction

In an era where digital innovation is paramount, Winee3 stands at the forefront, bridging the gap between the virtual world of Web3 and impactful real-world professional connections. Winee3 is not just about discovering events; it's about creating a space where like-minded individuals in the crypto and blockchain communities can connect, share experiences, and grow together. By integrating event organization with a focus on Web3 networking, Winee3 ensures that its users are not only part of the most relevant events but also engaged in a community that speaks their language – from blockchain enthusiasts to NFT collectors.

**Winee3: A Next-Generation Web3 Networking, Event, and NFT Ticketing SocialFi Super-App**

# Numbers: The Rise of Web3 and Social Networking Apps

The landscape of digital interactions and networking has undergone a seismic shift with the advent of Web3 technologies. This evolution mirrors the transformative impact once seen in the world of dating apps but now is centered around the burgeoning domains of cryptocurrency, blockchain, and NFTs.

## Influential Platforms in Web3 and Networking

Ethereum, introduced in 2015, has become a leading platform for blockchain applications, including NFTs and decentralized finance (DeFi), signifying the growing interest and investment in Web3 technologies.

Platforms like OpenSea have emerged as popular marketplaces for NFTs, showcasing the booming interest in digital collectibles and assets.

In the realm of professional networking, LinkedIn, launched in 2003, has grown to over 774 million users, highlighting the enduring importance of professional connections in the digital age.

# Growth of Web3 and Crypto Platforms

- The number of global blockchain wallet users has increased significantly, reaching over 70 million wallet users by [latest available data].

- Decentralized Finance (DeFi) platforms have seen explosive growth, with the total value locked in DeFi contracts surpassing $[latest figure].

- NFT sales volume has skyrocketed, with platforms like OpenSea reporting monthly transaction volumes in the millions.

## The Ongoing Evolution

The world of Web3 and professional networking continues to evolve, with new innovations and players entering the space regularly. This dynamic environment presents a fertile ground for platforms like Winee3 to innovate and lead in the SocialFi domain.

## The Billion-Dollar Potential: Revenue in Web3 and Social Networking

In recent years, the Web3 space, including cryptocurrency, NFTs, and blockchain technology, has seen remarkable financial growth, paralleling the success story of the dating app market in its early years.

# 990M
## LinkedIn has members
in more than 200 countries

Over 50 million LinkedIn app users are paying for premium feature

## Web3 and Crypto Market Revenue

- In 2022, the global blockchain market size was valued at $[latest figure], with expectations to grow exponentially. This growth is driven by increasing adoption of blockchain technology in various sectors.

- NFT sales, a cornerstone of the Web3 movement, have generated billions of dollars in revenue, with platforms like OpenSea leading the charge.

## Professional Networking and Event Market Insights

- The professional networking and online event industry have also seen significant financial growth. Platforms like LinkedIn have demonstrated the potential of professional networking, with a revenue of $[latest figure].

- The online event ticketing market, integrating technologies like blockchain for NFT ticketing, is projected to reach $[latest figure] by [forecasted year], highlighting the vast potential in this sector.

## User Engagement and Market Trends

- The number of active cryptocurrency users worldwide has seen a steady increase, with over [latest number] active crypto wallet users globally.

- The NFT space has not only attracted a large number of creators and collectors but also witnessed substantial investment and engagement from mainstream audiences.

- The professional networking space continues to expand, with millions of users actively seeking opportunities to connect, learn, and grow professionally through digital platforms.

## Investment in Web3 and Networking Services

A significant number of users in the Web3 and professional networking spaces are willing to pay for premium features, indicating a robust market ready to invest in value-adding services and experiences.

# Challenges in Today's Professional Networking Apps and Winee3's Solutions

## Challenges

**Limited Web3 Integration:** Many apps overlook the potential of blockchain and NFT technologies.

**Superficial Networking:** Surface-level connections without meaningful professional engagement.

**Engagement and Incentives:** Lack of rewards or incentives for active participation and contribution.

**Event Accessibility:** Difficulty in finding and accessing relevant professional events.

**Tech Advancements Utilization:** Underutilization of cutting-edge technologies for improved user experience.

**Community Building:** Challenges in fostering strong, diverse professional communities.

**Data Security and Transparency:** Inadequate measures for user data protection and operational transparency.

**Innovative Monetization:** Limited avenues for users to monetize their engagement or contributions.

## Winee3's Solutions

**Seamless Web3 Integration:** Incorporating blockchain and NFTs for secure ticketing and unique networking experiences.

**Deep professional networking:** Advanced algorithms and AI powered tools for valuable professional connections.

**Rewards & Token Economy:** Utilizing the $WNE token to incentivize engagement and active participation in the community.

**Enhanced Event Discovery:** Curating and facilitating access to a wide range of professional and Web3-related events.

**Leveraging advanced AI technology:** Employing the latest AI innovations for a supervisor user experience.

**Community Engagement:** Creating diverse and robust community ties through events and collaborative opportunities.

**Upholding Data Security:** Ensuring high standards of user data protection and transparent operations.

**Innovative Earning Opportunities:** Providing users with various avenues to earn and benefit from their involvement in the platform.

# Winee3:
## A Web3 Networking and Event Management Super-App

Winee3 stands as a pioneering Super-app at the intersection of professional networking, event management, and the dynamic world of Web3 and NFTs. It offers users a multi-faceted platform where these elements converge into a cohesive and engaging experience. Users can leverage these features either individually or in combination, introducing a revolutionary approach to professional interactions and networking. Driven by blockchain technology, Winee3 ensures secure, transparent, and rewarding experiences for all participants, including professionals, event organizers, and attendees.

With Winee3, users are empowered to connect with industry peers, discover and attend cutting-edge Web3 events, and engage in meaningful professional development opportunities. It caters to a broad spectrum of interests within the Web3 and tech community, going beyond conventional networking apps by fostering genuine, real-world professional relationships and collaborations. Attending events on Winee3 is not just about being present; it's an opportunity to engage deeply with the content, interact with thought leaders, and forge lasting professional connections.

Expanding its technological frontier, Winee3 integrates NFT ticketing, transforming each event ticket into a unique digital asset. This innovation not only provides a novel way for attendees to collect memorable tokens from events but also opens doors to exclusive experiences. NFT ticket holders might enjoy special privileges such as VIP access, behind-the-scenes content, and early announcements for upcoming events, nurturing a community that is both vibrant and exclusive to the Web3 realm.

## Winee3's Professional Networking Feature

Contrary to traditional perceptions of professional networking, Winee3 believes in creating a platform where meaningful, resonant professional connections lead to deep-seated satisfaction, bridging both tangible career goals and intangible personal growth.
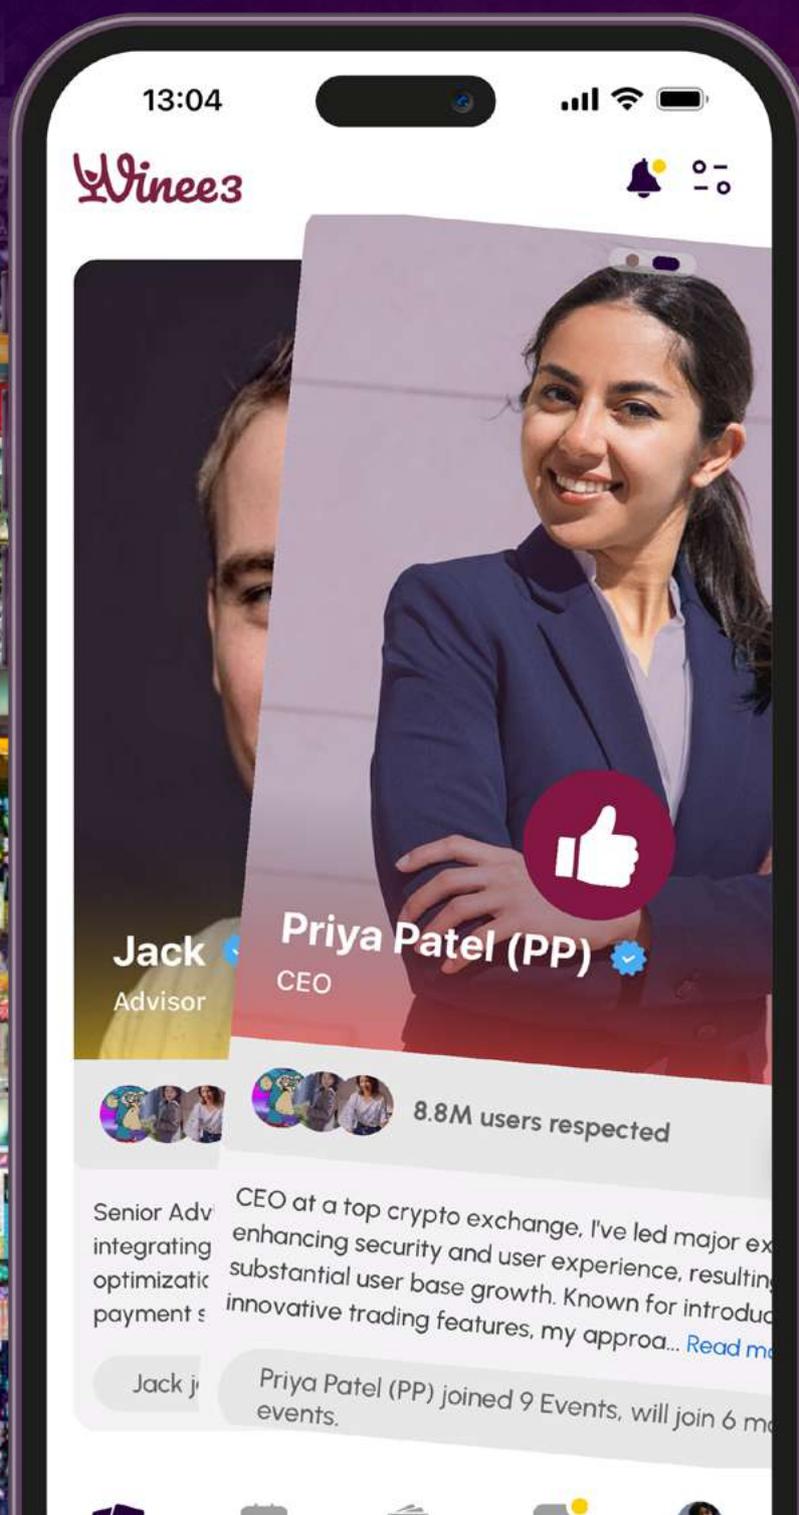

# Winee3's Professional Networking Approach

Moving beyond conventional networking platforms, Winee3 enables users to establish genuine connections with potential business partners, colleagues, and mentors. By attending events and gatherings tailored to their professional interests, users have the chance to meet like-minded individuals, fostering real-world professional relationships. This integration of event attendance with networking offers a novel approach to professional socializing.

## Sign-up and Profile Creation

Users begin by downloading Winee3 and registering, with options to sign up using a phone number, email, or Web3 wallet (like Wallet Connect, Trust Wallet, or Metamask). Profiles can be personalized with professional details, experiences, and interests.

## Swipe Feature (Professional Matchmaking)

Similar to dating apps, Winee3 introduces users to professional contacts in a one-by-one format, allowing them to express interest in networking by swiping right or indicate disinterest by swiping left. A match allows for messaging and potential professional collaboration.

| User 1 | | | |
|--------|---|---|---|
| | Match | Person with final like | Starts conversation |
| User 2 | | | |

**Inclusive Interaction Approach:** Winee3 adopts a model where the last user to express interest initiates the conversation, promoting active engagement and ensuring that connections are mutually beneficial.

**Messaging and Professional Discussions:** Users can exchange messages, share professional insights, and collaborate on ideas within the app, with the option to remove time stamps for a more natural interaction rhythm.

**From Conversations to Shared Professional Experiences:** Winee3 redefines professional networking by enabling users to invite new connections to web3-related events, meetups, and conferences events, enhancing the opportunity for shared experiences and collaboration.

**'Second Chance' Feature for Missed Connections:** This feature allows attendees of the same event to connect post-event, providing opportunities to establish professional relationships that might have been missed initially.

# AI and Winee3: The professional networking app for the future

Winee3 is a professional networking app that aims to connect people who share similar skills, interests, goals, and personality. Winee3 uses AI to provide a personalized and engaging experience for its users, who can find co-workers, collaborators, mentors, or learners in their field of expertise. Winee3 leverages AI in three main ways:

### Matching

Winee3 uses AI to analyze user profiles and preferences, and find the best matches for them based on their compatibility. Winee3 uses natural language processing, sentiment analysis, and recommender systems to understand the user's needs and suggest the most suitable co-workers or collaborators for them. Winee3 also allows users to filter and refine their matches based on various criteria, such as location, industry, experience, or availability.

### Communication

Winee3 uses AI to facilitate communication and collaboration between users, by providing chatbots, voice assistants, translation services, and smart scheduling. Winee3 enables users to interact with each other easily and efficiently, regardless of language barriers, time zones, or availability. Winee3 also helps users to exchange feedback, share resources, and coordinate tasks with their co-workers or collaborators.

### Engagement

Winee3 uses AI to enhance user experience and engagement, by providing personalized feedback, gamification, and social features. Winee3 helps users to improve their skills, track their progress, earn rewards, and connect with other users who share their interests or challenges.

# Winee3 and NFTs

We will explore how Winee3, the professional networking app for the future, can leverage NFTs to provide a personalized and engaging experience for its users, who can find co-workers, collaborators, mentors, or learners in their field of expertise.

## Building a social identity

Winee3 can allow users to display their NFTs from various projects as their profile pictures, badges, or avatars, and showcase their unique personality, style, and status. Winee3 can also enable users to verify their ownership of their NFTs using blockchain technology, and enhance their credibility and reputation in the network. Winee3 can also help users to discover and connect with other NFT owners who share similar interests, goals, or backgrounds, and create a sense of belonging and community.
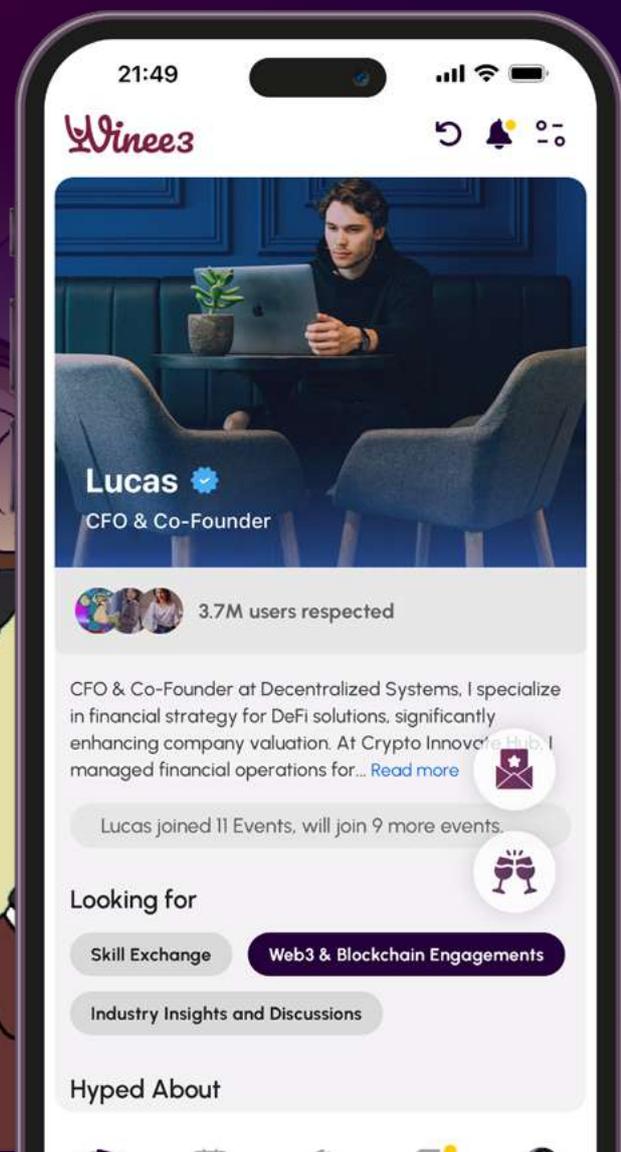

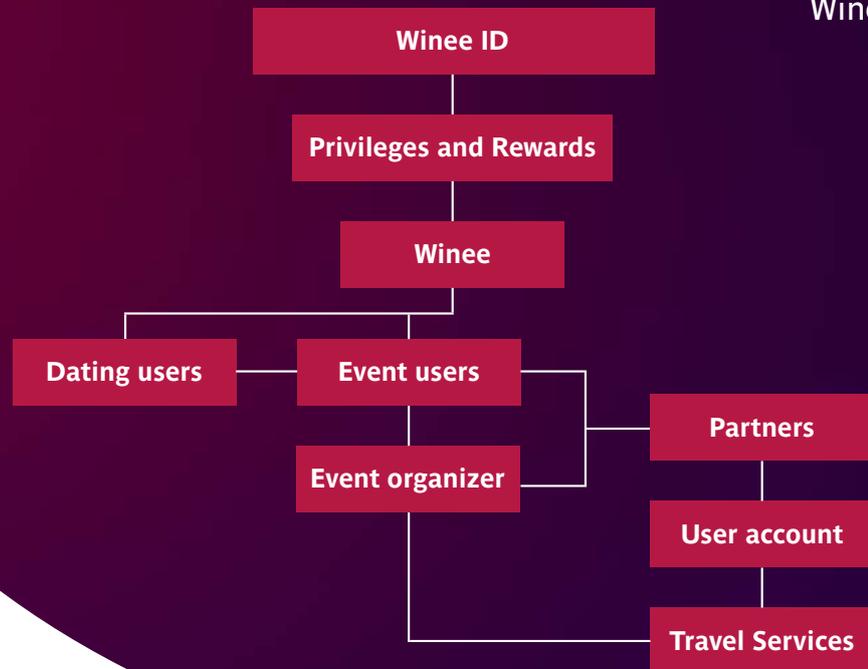

## Leveraging the intellectual property rights

Winee3 can empower users to utilize their NFTs as a source of inspiration, creativity, and innovation. Winee3 can allow users to create and share their own content, products, or services based on their NFTs, and monetize their intellectual property rights. Winee3 can also enable users to collaborate with other NFT owners or creators, and exchange ideas, feedback, or resources. Winee3 can also help users to access exclusive opportunities, events, or platforms that are reserved for NFT owners or members.

## Benefiting from the network effects

Winee3 can harness the network effects of the various NFT projects, which are some of the most popular and successful in the world. Winee3 can attract more users, investors, partners, and media attention to its platform, and increase its value and growth potential. Winee3 can also leverage the social influence and reach of the NFT owners, who include celebrities, influencers, and leaders in various fields. Winee3 can also tap into the cultural and artistic impact of the NFT projects, which have spawned a vibrant and diverse ecosystem of art, music, fashion, and entertainment.

# Winee ID

*Bridging Web2 Familiarity and Web3 Innovation*

Winee3 acknowledges the comfort and familiarity that Web2 users have with using their email address as a unique identifier, a practice that remains widely effective. While valuing the present, Winee3 also embraces the future, aligning with the global transition towards Web3 technologies. This dual approach positions Winee3 as a platform that respects the legacy of Web2 while adopting the principles of Web3, staying attuned to current and emerging trends. Our forward-thinking strategy ensures that we remain relevant with evolving technologies without dismissing the foundations that have been successful.

# ERC-721 – Winee ID: Empower Your Identity

Your Wallet, Your Key: In the realm of Winee3, your identity is enhanced with the integration of a Web3 crypto module. This enables you to create a unique ID that leverages the benefits of blockchain technology, applicable across both event management and professional networking modules. This unique ID, represented as an ERC-721 token, is personalized and secured, offering privileges exclusively to Winee3 app users within our ecosystem.

Simply connect your Web3 crypto wallet, and let us tailor your experience. Your ERC-721 token is not just a digital identity; it's a gateway to a series of unique benefits, security, and personalized experiences. Look forward to a range of exciting surprises and rewards specifically designed for our Winee ID users, enhancing your journey in the ever-evolving world of Web3 and professional networking.

# Winee Points Explained

Drawing inspiration from airline mileage programs that many are familiar with, let's delve into the concept of Winee Points.

Just as frequent flyers accumulate miles based on the distance they travel, Winee users earn Winee Points based on various interactions and commitments they make both within and outside the app. These points symbolize more than just a number; they are a testament to a user's engagement and loyalty to the Winee ecosystem.

**Here's how you can accrue Winee Points:**

- **In-app Activities:** Engage in specific events or tasks within the app and watch your Winee Points grow.

- **Out-of-app Promotions:** Participate in select external events or promotions associated with Winee to earn bonus points.

- **WineeDuo Staking:** Dive deep into the world of cryptocurrency and earn Winee Points by staking your $WNE tokens. This not only strengthens the Winee network but also rewards you with precious points.

- **Direct Purchase:** Want to amplify your Winee Point balance instantly? You have the flexibility to purchase them directly using your credit card.

- **Exchange for $WNE Token and Selected Cryptocurrencies:** Holding $WNE or other select cryptocurrencies? Exchange them for Winee Points and tap into the exclusive features and benefits they unlock.

# Winee Points Utilities

Think of Winee Points as your passport to exclusivity. The more you collect, the higher your status and the richer your Winee experience becomes. Whether it's getting first access to features, enjoying premium benefits, or unlocking exclusive events, Winee Points are your gateway to a world of unparalleled experiences. So, embark on this rewarding journey and let every point take you closer to the best Winee has to offer.

Some of the utilities that you can enjoy with your Winee Points are:

● **Boost your profile:** You can use your Winee Points to boost your profile visibility and attractiveness, by highlighting it in the app, adding badges or stickers, or enhancing your photos and videos. Boosting your profile can help you get more views, likes, and matches, and increase your chances of finding your ideal professional partner.

● **Unlock more matches:** You can use your Winee Points to unlock more matches per day, or to extend the time limit for your matches. Unlocking more matches can help you explore more options and opportunities, and find the best fit for your preferences and goals.

● **Chat with anyone:** You can use your Winee Points to chat with anyone in the app, even if you are not matched with them. Chatting with anyone can help you initiate conversations, express your interest, or ask questions, and expand your network and connections.

● **Access premium features:** You can use your Winee Points to access premium features, such as advanced filters, reverse matches, or video calls. Accessing premium features can help you refine your search, revisit your choices, or enhance your communication, and improve your user experience and satisfaction.

● **Join exclusive events:** You can use your Winee Points to join exclusive events, such as workshops, webinars, or parties, that are organized by Winee or its partners. Joining exclusive events can help you learn new skills, gain new insights, or have fun, and meet other like-minded and respectful professionals in person.

These are some of the utilities that you can enjoy with your Winee Points. Winee Points are not only a currency, but also a symbol of your status and reputation in the Winee community. The more Winee Points you have, the more you can show your commitment, confidence, and competence, and the more you can attract and impress other users. Winee Points are your passport to exclusivity, and your ticket to a world of unparalleled experiences.

# Share2Earn - A way to earn Winee points

One of the ways to earn Winee Points is to use the SHARE2EARN feature, which is a viral feature that prompts you to complete a social task in order to receive daily tokens. The social task involves posting your unique code to Instagram stories or tweets and getting other people to verify it. Your unique code is a random alphanumeric code that is generated by the app every time you use the SHARE2EARN feature. You can copy your unique code from the app and paste it into your Instagram story or tweet, along with a message inviting other people to verify it. You can also add hashtags, stickers, or filters to make your story more attractive and engaging.

Other people who see your story can verify your code by inputting it into the app. To do this, they have to go to the SHARE2EARN feature in the app, and enter your code in the verification box. They can also scan a QR code that is displayed on your story, which will automatically redirect them to the app and verify your code. When someone verifies your code, you will receive a notification in the app, and your verification count will increase by one. You can also verify other people's codes by following the same steps. You can find other people's codes by browsing their Instagram stories, or by searching for the hashtags related to the SHARE2EARN feature.

When you use the SHARE2EARN feature, you will receive a certain number of tokens every day, depending on how many people verified your code, and how many codes you verified. The more you share and verify, the more tokens you will receive. You can check your token balance and your verification count in the app, and you can also see a leaderboard of the most verified users in the app. You can use your tokens to redeem Winee Points, which are your passport to exclusivity in the Winee app. You can also use your tokens to access other features and benefits in the app, such as boosting your profile, unlocking more matches, chatting with anyone, accessing premium features, or joining exclusive events.  You can also convert them to Winee3's own token, $WNE.

The SHARE2EARN feature is designed to make earning Winee Points more fun and social, and to create a more viral and interactive professional community. By using the SHARE2EARN feature, you can not only earn more Winee Points, but also increase your exposure and visibility in the app, and attract more views, likes, and matches.

## Integrating Traditional and Blockchain Ticketing

Winee3's event ticketing system is a groundbreaking amalgamation of traditional ticketing practices and the innovative application of blockchain technology. This dual approach guarantees an effective, secure, and user-friendly ticketing experience. It caters to the diverse needs of both traditional event-goers and crypto-savvy users, offering a comprehensive solution in the evolving landscape of event management.

## Unlocking Non-Negotiable NFT Utilities: Embracing the Uniqueness

NFT TICKET
YOUR VIP ACCESS TO THE EVENT
DATE: 2023-11-11

SCAN THE QR-CODE

## Advanced Filter Functionality and Job Sharing

The app boasts an advanced filter functionality, crucial for pinpointing individuals, job postings, and other relevant items. Users benefit from detailed filtering options, allowing them to tailor their search to specific criteria, enhancing the efficiency and relevance of the results. For example, users can filter by location, industry, experience, skills, interests, personality, availability, or goals. Users can also save their filters and preferences for future use, or modify them as needed. Complementing this is the ability to share job postings within the network. Users can not only post and circulate job opportunities but also recommend their contacts for suitable positions, thereby fostering a collaborative professional environment. Users can also receive notifications and alerts when a new job posting matches their profile or preferences, or when someone in their network recommends them for a job. Users can also rate and review the job postings and employers, and provide feedback and suggestions to improve the quality and diversity of the opportunities.
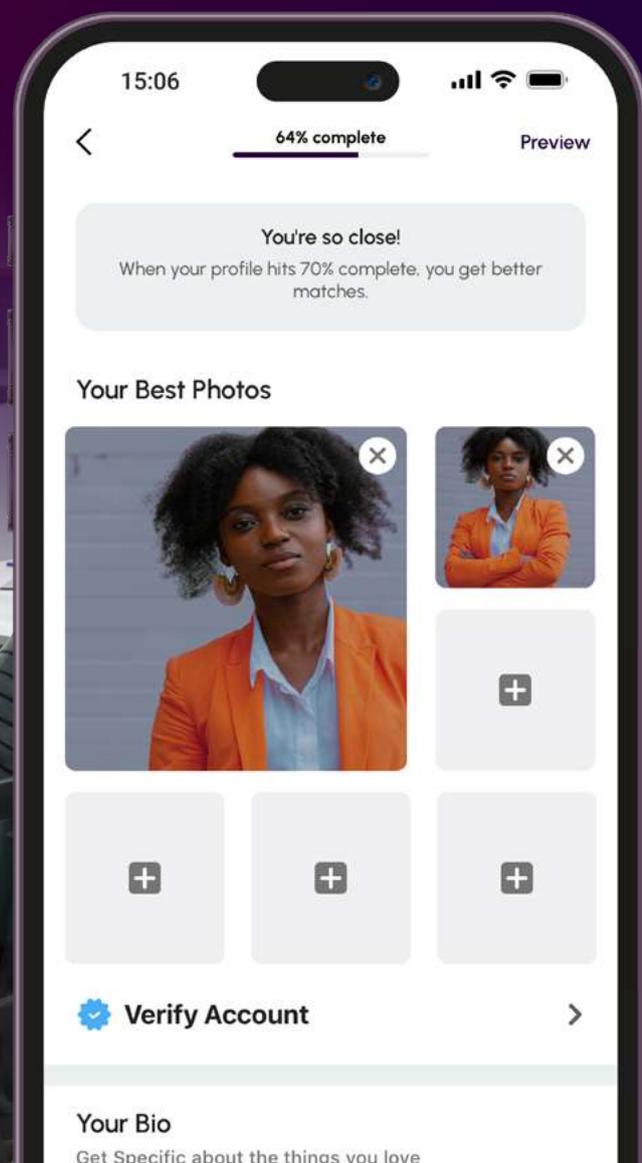

## Professional Profiles and Direct Applications

User profiles on Winee3 are designed to be comprehensive, showcasing professional experiences, skills, and achievements akin to platforms like LinkedIn. This feature not only enables users to present a detailed professional persona but also facilitates meaningful connections based on shared career interests and expertise. Additionally, the platform allows users to directly apply for jobs or projects, leveraging their detailed profiles and attached CVs or resumes for a streamlined application process. Some of the benefits of this feature are:

### Personalization

Users can customize their profiles to reflect their personality, style, and goals, and highlight their strengths and accomplishments. Users can also add multimedia elements, such as photos, videos, or audio clips, to showcase their work or portfolio. Users can also link their profiles to their social media accounts, blogs, or websites, to increase their online presence and visibility.

### Recommendation

Users can receive personalized recommendations for jobs, projects, or co-workers, based on their profile information and preferences. Users can also use the app's AI assistant, which can analyze their profiles and suggest ways to improve them, such as adding new skills, updating their experiences, or requesting endorsements or testimonials. Users can also use the app's voice recognition feature, which can create or edit their profiles using natural language processing and chatbot technology.

### Application

Users can directly apply for jobs or projects within the app, without the need for external communication or coordination. Users can also choose the preferred mode of application, such as video interview, voice interview, or chat interview, and the app will automatically generate and share the application link or details with the employers or clients.

## Appointment Setting and Calendar Integration

Winee3 enhances professional interaction by incorporating an appointment setting feature, allowing users to effortlessly schedule one-on-one meetings or group discussions. This is seamlessly integrated with a user-friendly calendar system within the app, complete with automatic updates and reminders. Furthermore, Winee3's calendar can synchronize with external calendars like Google Calendar, ensuring that users have a unified view of their professional commitments, events, and meetings, all in one place. Some of the benefits of this feature are:

● **Convenience:** Users can easily create, edit, or cancel appointments within the app, without the need for external communication or coordination. Users can also choose the preferred mode of meeting, such as video call, voice call, or chat, and the app will automatically generate and share the meeting link or details with the participants. Users can also set their availability and preferences for the meeting times and durations, and the app will suggest the optimal slots for them.

● **Efficiency:** Users can save time and effort by using the app's smart scheduling feature, which can automatically find and book the best time for a meeting, based on the availability and preferences of the participants. Users can also use the app's AI assistant, which can handle the meeting requests, confirmations, cancellations, and rescheduling, using natural language processing and chatbot technology. Users can also use the app's voice recognition feature, which can transcribe and summarize the meeting notes and action items, and share them with the participants.

● **Engagement:** Users can increase their engagement and interaction with their co-workers, collaborators, mentors, or learners, by using the app's gamification and social features. Users can earn points, badges, or rewards for attending or hosting meetings, and use them to access exclusive opportunities, events, or platforms. Users can also rate and review the meetings and participants, and provide feedback and suggestions to improve the quality and effectiveness of the meetings. Users can also join or create groups, communities, or clubs within the app, where they can meet and network with other users who share their interests, goals, or challenges.
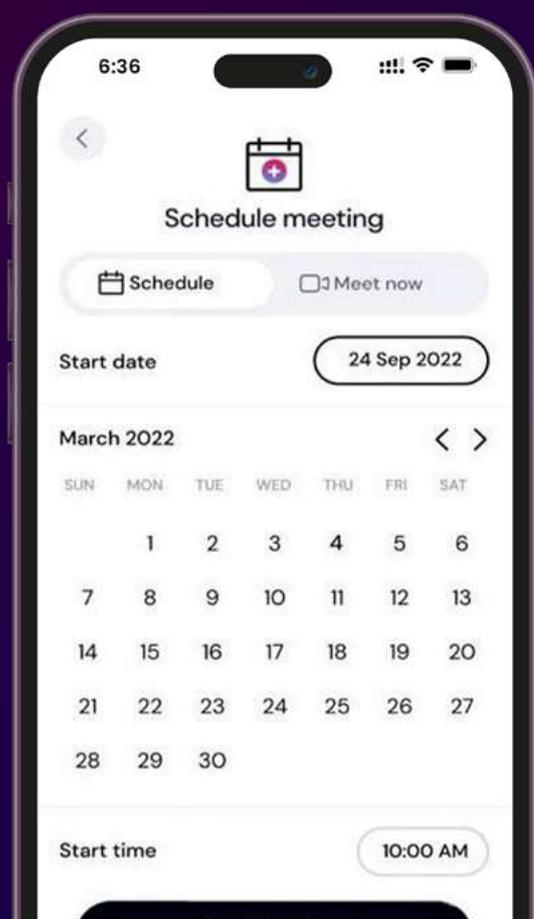

## Peer-to-Peer Learning and Enhanced Professional Interaction

Peer-to-Peer Learning and Enhanced Professional Interaction: One of the key features of Winee3 is its emphasis on collaborative learning, which is based on the idea that people can learn better from each other than from traditional sources of information. Winee3 supports peer-to-peer learning sessions where users can share their knowledge and skills with other professionals who have similar interests or goals. These sessions can take various forms, such as workshops, webinars, podcasts, or live chats, depending on the preferences and needs of the participants. By facilitating these sessions, Winee3 aims to create a hub for professional growth, where users can not only acquire new competencies, but also network and build relationships with their peers. These community-led workshops and sessions are a testament to the app's commitment to fostering a dynamic and interactive professional community, where users can exchange ideas, feedback, and support.

Moreover, Winee3's nuanced approach to messaging and interaction enhances the overall user experience by creating a more natural and stress-free communication environment. For example, Winee3 does not display time stamps in conversations, which means that users do not have to worry about responding immediately or being seen as rude or uninterested. This feature also allows users to have more flexibility and control over their own pace and availability, without feeling pressured or obligated by external factors. Winee3 also provides other features that make messaging and interaction more enjoyable and effective, such as emojis, stickers, voice notes, and video calls. Winee3 believes that communication is not only a means to an end, but also an end in itself, and therefore strives to make it as pleasant and rewarding as possible for its users.

**Unique Networking Features and AI-Powered Verification:** The app's networking features are further enhanced by allowing users to reference up to three other users, facilitating targeted and meaningful connections. This novel approach encourages community-driven networking and event attendance. Additionally, Winee3 employs advanced AI technology for profile verification, surpassing traditional methods to ensure authenticity and reliability in user profiles. This dual approach of leveraging AI for verification and community-driven references significantly enriches the networking experience on the platform.

**KYC for Enhanced Security and Trust:** Recognizing the importance of security, especially in the crypto space, Winee3 implements a rigorous KYC (Know Your Customer) process. This step is vital for identity verification, ensuring the safety and trustworthiness of all transactions within the app. By integrating with established third-party KYC services, Winee3 upholds stringent security standards, ensuring that user data is managed with the utmost care and in compliance with privacy regulations.

**Push Notifications for Enhanced Engagement:** Winee3 incorporates a sophisticated push notification system designed to keep users informed and engaged. This feature plays a crucial role in enhancing user experience by providing timely updates about new connections, incoming messages, upcoming events, and other relevant activities tailored to their interests. Whether it's a reminder about an event they've shown interest in or a prompt about a new connection request, these notifications ensure that users stay connected and engaged with the Winee3 community, making the most out of the networking opportunities the platform offers.

**Feedback and Rating System for Community Trust:** Trust and transparency are pillars of the Winee3 experience. To foster these values, the app includes a comprehensive feedback and rating system. Users have the ability to rate and review events, discussions, and the connections they make. This system not only helps in building trust within the community but also assists others in making informed decisions about which events to attend or which professionals to connect with. By enabling honest feedback, Winee3 ensures that the quality of interactions and events remains high, thereby nurturing a reliable and supportive professional network.

**Robust Privacy and Security Settings:** In the world of Web3 and professional networking, privacy and security are paramount. Winee3 is designed with robust privacy and security settings, allowing users to have complete control over their personal information and how it is shared. These settings are particularly crucial for a crypto-savvy audience who value the integrity and confidentiality of their data. Users can customize their privacy preferences, ensuring that they share only what they are comfortable with, and have peace of mind knowing that their data is protected by the latest security protocols.

# Respect feature

The "Respect feature" is a unique and innovative feature of Winee3, the professional matching app that helps users find and connect with other professionals who share their interests, goals, and values. The Respect feature allows users to show their appreciation and recognition for other accounts that they find valuable, inspiring, or helpful. Users can respect other accounts by tapping on the Respect button on their profiles, which will increase their Respect score by one point. The Respect score is a measure of how much the profile/user is respected and accepted and trusted by the community. The higher the Respect score, the more likely the profile/user is to be matched with other compatible and respectful users, and to receive more opportunities and benefits from the app.

The Respect feature is designed to foster a positive and supportive professional community, where users can encourage and motivate each other, and learn from each other's experiences and insights. The Respect feature also helps users to discover and follow accounts that are relevant and influential in their fields, and to gain more visibility and credibility for their own accounts. The Respect feature is not only a way to express gratitude and admiration, but also a way to build trust and rapport with other users, and to create meaningful and lasting professional relationships. Winee3 believes that respect is the foundation of any successful professional interaction, and therefore strives to make it as easy and rewarding as possible for its users to respect and be respected.
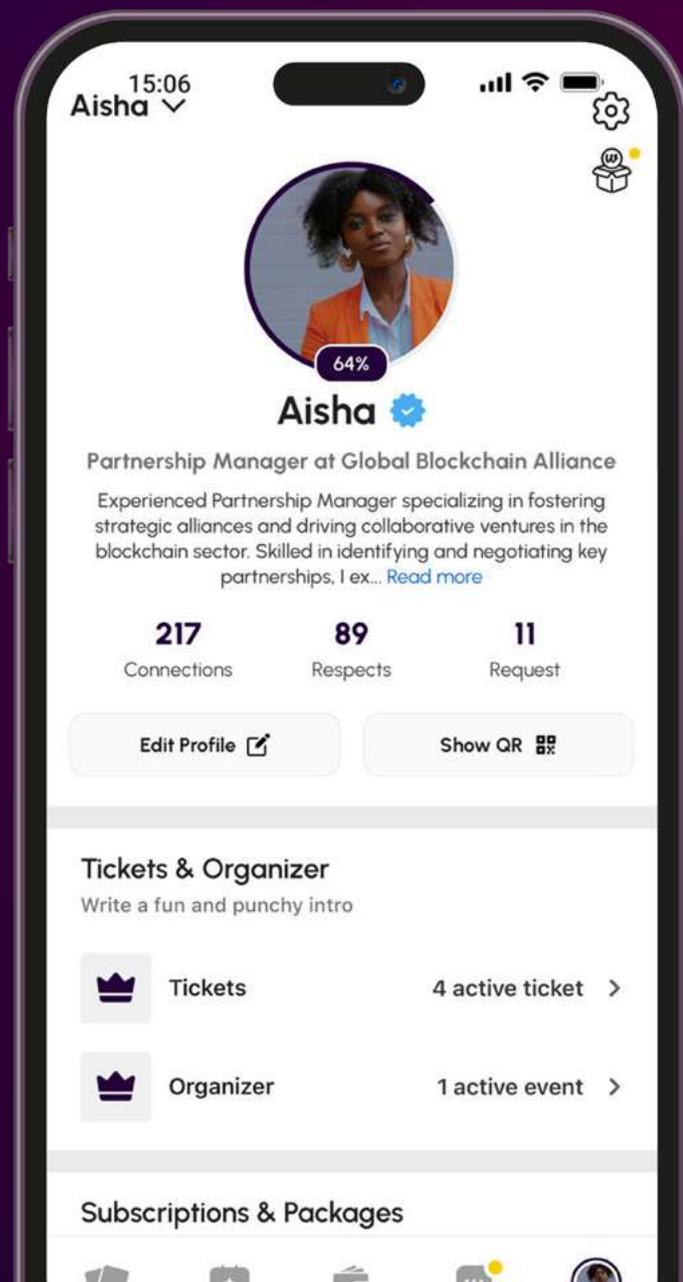

# Respect - a way to spend Winee Points

Users can spend their points by using the Respect button, which is a special button that allows users to show their respect and appreciation for other users they like or admire in the app. The Respect button is located on the profile page of each user, and it costs a certain number of points to use it. When a user sends respect to another user, the recipient will get notified that the sender did it, and they can see the sender's profile and message them. Sending respect can also increase the likelihood of getting a match with the recipient, as the app will prioritize the profiles of the users who have sent or received respect. Sending respect is a new way of getting attention and interest from someone, and it can also help users to express their personality, values, and goals.

**Leaderboard and ranking:**

Another feature of the Winee app is the leaderboard, which is a ranking system that shows the daily, weekly, monthly, and absolute best respected users of the network. The leaderboard is based on the respect score of each user, which is a measure of how much respect they have received from other users. The respect score is displayed on the profile page of each user, and it can also be seen on the leaderboard. The leaderboard can be accessed from the main menu of the app, and it can be filtered by category, location, industry, or skill, to find the most relevant and specific results.

The leaderboard is designed to showcase and celebrate the achievements and contributions of the most respected and influential users in the Winee app. The leaderboard also serves as a source of inspiration and motivation for other users, who can learn from the best practices and strategies of the top performers, and aspire to improve their own respect score and ranking. Users who rank high on the leaderboard will receive additional points for their performance, as well as other rewards and benefits, such as badges, stickers, or invitations to exclusive events. The leaderboard is updated daily, based on the respect score of the users in each category.

# Leaderboard

The "Leaderboard" feature is an extension of the Respect feature, which allows users to see who got the most respect in each category of work, such as engineering, design, marketing, etc. The Leaderboard feature is a way to showcase and celebrate the achievements and contributions of the most respected and influential users in the Winee3 app. The Leaderboard feature also serves as a source of inspiration and motivation for other users, who can learn from the best practices and strategies of the top performers, and aspire to improve their own respect scores and rankings.

The Leaderboard feature is accessible from the main menu of the Winee3 app, where users can select the category of work they are interested in, and see the list of the top 10 users with the highest respect scores in that category. The list shows the name, profile picture, respect score, and a brief summary of each user, as well as a button to view their full profile or send them a message. Users can also filter the list by location, industry, or skill, to find more relevant and specific results. The Leaderboard feature is updated daily, based on the respect scores of the users in each category.

The Leaderboard feature is designed to create a more competitive and collaborative professional community, where users can see how they compare to their peers, and challenge themselves to gain more respect and recognition. The Leaderboard feature also encourages users to build a better community in the Winee3 app, by respecting and supporting other users, and sharing their knowledge and skills with them. The Leaderboard feature is not only a way to measure and display success, but also a way to create and foster meaningful and lasting professional relationships. Winee3 believes that respect is not only a reward, but also a responsibility, and therefore strives to make it as easy and rewarding as possible for its users to respect and be respected.

**Analytics and Dashboard for Personal Insights:** Winee3 also offers a sophisticated analytics and dashboard feature, enabling users to monitor and track their networking activities, event participation, and other relevant metrics. This personalized dashboard provides valuable insights into users' engagement patterns, helping them understand their progress in building connections and growing their professional network. Whether it's tracking the number of new connections made, evaluating participation in events, or monitoring the response rate to messages, these analytics play a crucial role in helping users assess their networking strategies and make data-driven decisions to optimize their professional interactions on the platform.

**Enhanced Location Matching for Event-Specific Connections:** In a significant advancement over existing apps that typically match users within a broad 1-2 km radius, Winee3 introduces a more refined approach to location-based matching. By concentrating on a much narrower range, Winee3 elevates the precision of its location matching capabilities. This focused approach is especially effective in connecting users who are attending the same event or are in the same event vicinity. By enabling this feature in the app, users can effortlessly discover and connect with others who share similar interests and are physically present in the same event space. This not only enhances the potential for meaningful networking opportunities but also maximizes the chances of users meeting and interacting in real-time, in the same event environment.

The event ticket sharing feature in Winee3 represents a significant step towards simplifying and enhancing the user experience, particularly in fostering genuine connections. This functionality allows users, whether they have connected within the app or met in real life, to easily share access to events, seamlessly bridging the gap between digital interaction and real-world experiences.

**Enhancing Connections Through Shared Experiences:**

The ticket sharing feature is more than just a convenience; it's a tool for building relationships. It opens up new avenues for users to connect over common interests and experiences. For instance, two users who discover a mutual appreciation for a particular type of event can easily decide to attend together, thereby deepening their connection. This shared experience becomes a powerful catalyst for developing more meaningful and lasting relationships, be it professional networking or personal interactions.

**Integrating with Winee3's Ecosystem:**

This feature is fully integrated into the Winee3 ecosystem, ensuring that the ticket exchange is secure and aligned with the user's event preferences and history. The simplicity of the process aligns with Winee3's commitment to user convenience and enhances the overall appeal of the app as a comprehensive platform for professional networking and event participation.

In summary, the ticket sharing feature in Winee3 not only simplifies the process of attending events but also plays a crucial role in enriching the social and professional lives of its users, fostering a community that values shared experiences and genuine connections.

**Premium Privileges in Winee3:**

Winee3 distinguishes itself from conventional apps by offering an array of premium features that genuinely enhance the user experience without imposing pressure to spend. Our approach prioritizes maximizing user interaction and engagement, providing a rich set of free features alongside exclusive benefits for premium sub-scribers.

For those opting for premium membership, Winee3 offers:

**Exclusive Job Posting Rights**

Premium users have the privilege of posting job opportunities in the job search section, increasing visibility to a wide network of professionals.

**Advanced Job Opportunity Filters**

A more sophisticated filter system for job searches, allowing premium users to tai-lor their job hunt with greater precision.

**Weekly Super Likes**

Each week, premium members receive five Super Likes, offering enhanced chances of making meaningful connections.

**Profile Swipe Insights**

The ability to see who has swiped on their profile, offering insights into potential connections.

**Incognito Mode**

A feature for discreet browsing, allowing users to view profiles without revealing their own identity.

**Unlimited Backtrack**

Offering unlimited chances to revisit and reconsider profiles they initially passed on.

**Prioritized Profile Display**

Ensuring their profile appears more frequently to those they've swiped right on, increasing the likelihood of a match.

**Unlimited Likes**

Removing the cap on the number of likes, allowing unrestricted expressions of interest.

**CV Sending Capability**

Enabling users to directly send their CV or resume to potential employers or connections.

**Use of Advanced Filters**

Providing access to more detailed filtering options for networking and event discovery.

**Exclusive Networking Opportunities**

Access to premium-only events, webinars, and networking sessions.

**Early Access to New Features**

Premium members get first access to new app features and updates.

## Enhanced Support and Feedback Loop

Priority customer support and the ability to provide direct feedback for future app enhancements.

## Customizable Privacy Settings

Advanced options to manage visibility and privacy within the app, giving users greater control over their online presence.

*Winee revolutionizes event management by harnessing smart contracts for automated scheduling, guest management, and revenue sharing. This integration of blockchain technology ensures efficiency and transparency in organizing events.*

Embracing Technology and Human Connection: At Winee, we blend cutting-edge tech with the warmth of human interactions. Imagine the joy of sharing a Metallica concert experience with someone - Winee makes such moments happen.

Prioritizing Web3 Integration: For Winee, the adoption of Web3, Blockchain, and Crypto technologies is not just a strategy but a commitment. We prioritize this integration over mere commercial gains, opening a realm of limitless possibilities for our users.

*Discover more about how Winee leverages these technologies in the $WNE and Tokenomic sections of our whitepaper.

# 'Second Chance' Feature:

The 'Second Chance' feature in Winee3 is designed to address a common scenario in professional and social gatherings: missed connections. It's not unusual to attend an event, spot someone you'd like to connect with, but for various reasons – be it hesitation or timing – you don't get the opportunity to interact. Winee3's 'Second Chance' offers a solution to this.

## How 'Second Chance' Works:

- **Post-Event Profile Visibility:** After attending an event, users can opt-in to allow their profiles to be visible to other attendees. This feature activates after the event, creating a digital space where attendees can explore connections they might have missed.

- **Mutual Interest, Post-Event Connection:** If both individuals attended the same event and are interested in connecting afterward, they can view each other's profiles through Winee3. This opens the door to initiating a conversation, setting up a meeting, or simply starting a professional dialogue.

- **Fostering Professional Relationships:** This feature is particularly valuable for building professional networks. It allows users to reconnect with individuals who could be potential business partners, collaborators, or industry peers, ensuring that brief encounters at events can develop into meaningful professional relationships.

## The Benefit of 'Second Chance':

The 'Second Chance' feature acknowledges the dynamic nature of events – the hustle and bustle, the multitude of interactions – and provides a way to revisit potential connections that were overlooked or couldn't be made at the time. It's an acknowledgment that sometimes, a second chance can open doors to new opportunities, friendships, and professional collaborations that enrich the Winee3 user experience.
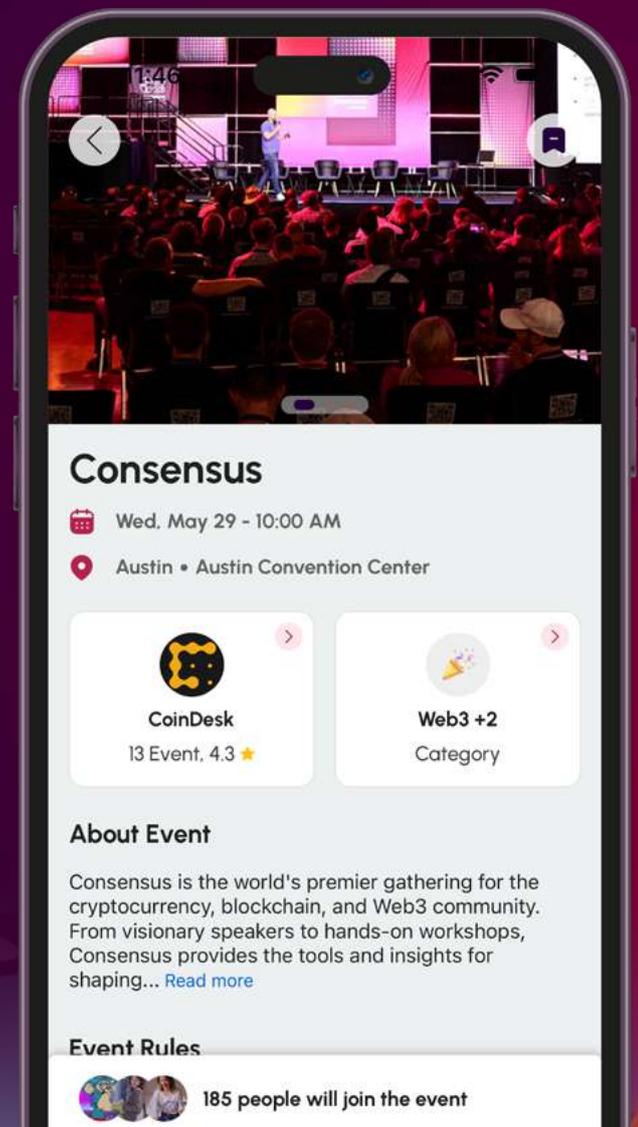

# Winee3 Referral Program: Rewards for Expanding Our Community

## Program Structure:

Winee3's referral program is designed to incentivize existing users to bring new members into our dynamic community, with rewards scaled based on the level of engagement of the referred new users.

## Reward Tiers:

### 1     For App Registration and Usage:

**Reward:** When a referred user successfully registers and begins using the Winee3 app, the referrer earns Winee Points.

**Application:** These points can be used within the app for accessing various features like Superlikes, Respects and second chances, enhancing the overall user experience.

### 2     For Premium Package Purchases:

**Reward:** When a referred individual purchases a premium package, the referrer is rewarded with $WNE tokens.

**Flexibility in Usage:** These earned $WNE tokens offer complete freedom in their use. Referrers can choose to utilize them within the Winee3 ecosystem for various services and features, or they have the option to sell or exchange these tokens as they wish, providing a flexible and valuable reward that fully embraces the principles of Web3 and cryptocurrency.

# Tracking and Management

Users can track their referrals and rewards through a dedicated section in the app, ensuring transparency and ease of monitoring their referral success.

## Benefits for Referrers

Opportunity to earn rewards in two forms: Winee Points for basic engagement and $WNE tokens for premium conversions.

Enhanced in-app experience or financial rewards, depending on the type of user engagement from referrals.

## Incentives for New Users

Exposure to Winee3's professional networking and event management features.

Opportunity to explore the app's premium offerings, unlocking additional functionalities.

# Every Web3 Enthusiast Matters: Embracing the Spectrum of Users

At Winee3, we recognize the value of every user who steps into the world of Web3, and we're committed to providing an enriching experience for all. Understanding that our community comprises a diverse range of users, from those familiar with Web2 to budding Web3 enthusiasts and seasoned veterans in the Web3 space, Winee3 is designed to cater to this entire spectrum:

**Web2 Regulars:**

For users transitioning from Web2, Winee3 offers an intuitive experience, easing them into the Web3 world without overwhelming them. This approach ensures a comfortable and seamless adaptation to new technologies and concepts. One of the features that Winee3 provides is the ability to use OAuth, an open standard protocol for authorization, to sign in with their existing accounts on other platforms, such as Google or Apple. This way, users can grant Winee3 access to their information on those platforms without sharing their passwords. OAuth also allows users to revoke or manage the access permissions at any time. This feature enhances the security and convenience of the users, and allows them to leverage their existing social identity and network on Winee3.
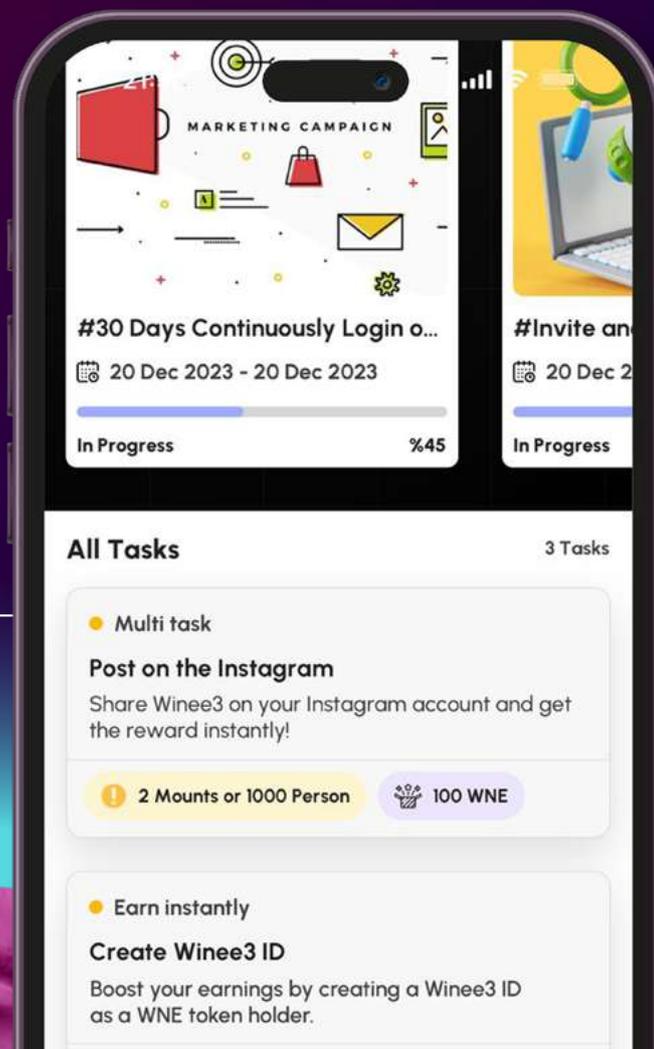

**Web3 Newcomers:**

Recognizing the curiosity and eagerness of new Web3 enthusiasts, Winee3 provides educational resources, user-friendly tools, and community support to help them navigate and grow in this exciting new domain. One of the tools that Winee3 provides is the integration of WalletConnect, an open source protocol for connecting decentralized applications to mobile wallets. WalletConnect simplifies the integration of crypto wallets and DApps for developers, ensuring effortless connections. WalletConnect also allows users to interact with DApps without sharing their private keys, enhancing their security and convenience. WalletConnect also enables users to receive push notifications and chat messages from their favorite DApps, increasing their engagement and awareness. WalletConnect is the communications protocol for Web3, and Winee3 leverages it to connect its users to the best DApps and opportunities in the Web3 world.

**Dedicated Web3 Advocates:**

For the experienced Web3 users, Winee3 is a platform that matches their passion and knowledge, offering advanced features, deeper engagement opportunities, and a community that speaks their language.

Winee3 bridges these worlds, creating a cohesive community where everyone, regardless of their familiarity with Web3, finds value and connection. Welcome to a platform where diversity in experience and enthusiasm is not just recognized, but celebrated.

Welcome to Winee3 – a club where everyone has a place.

# Winee3: Integrating Networking, Event Management, NFTs, and Crypto into a Unified Platform

Welcome to Winee3, where we converge the realms of professional networking, event engagement, and the vibrant world of Web3 and cryptocurrencies. This convergence creates a unique ecosystem for users to connect, learn, and grow, while also enjoying the exciting possibilities brought forth by blockchain technology and NFTs.
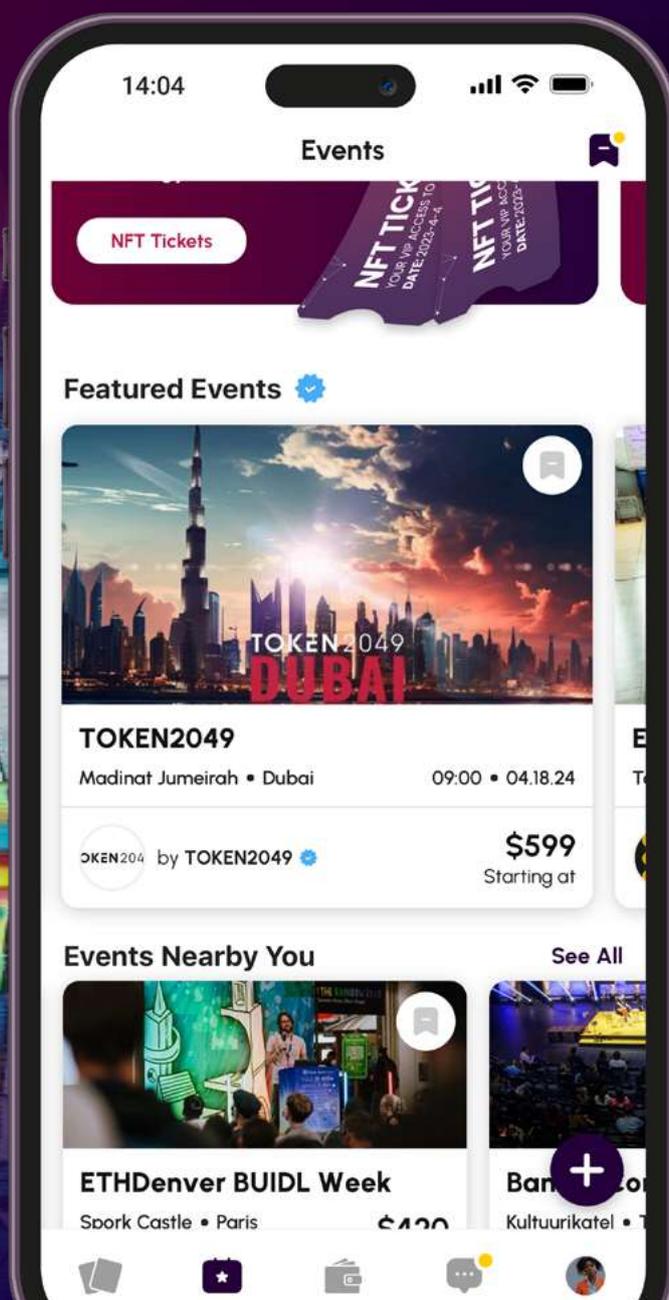

# Blockchain-Powered Event Organization and NFT Ticketing with Winee3

*Winee3 stands at the forefront of innovating event organization and ticketing through the power of blockchain technology.*

The platform revolutionizes the conventional ticketing system by integrating a secure and transparent blockchain-based mechanism. This approach effectively addresses common issues like scalping and fraud, enhancing both security and trust in the ticketing process. By tokenizing event tickets as NFTs, Winee3 not only provides collectors with unique digital assets but also enriches the event experience with exclusive perks, fostering a vibrant and engaged community.

Winee3's blockchain-powered ticketing system allows users to securely purchase tickets, assuring them of authenticity and fair pricing. This transparency not only builds trust within the community but also ensures a more equitable and enjoyable event experience for all attendees.

Taking a step further, Winee3 leverages the uniqueness of NFTs to redefine event ticketing. Each ticket is transformed into a distinct digital collectible, unlocking access to a range of exclusive event features such as premium content, backstage experiences, and early announcements. This innovation significantly enhances the value of attending events, creating a sense of exclusivity and community among NFT ticket holders.
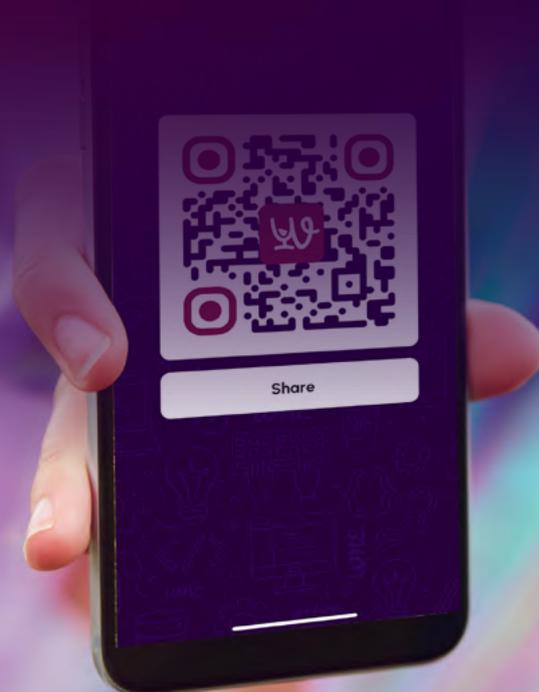

# Winee3 Event Ticketing System:
# An Engineering Perspective

Winee3 innovatively combines the reliability of traditional ticketing systems with the cutting-edge technology of blockchain and NFTs, presenting a robust, secure, and forward-thinking solution in event ticketing.

## System Architecture

**1**    **Centralized Server and Decentralized Blockchain Integration**

Winee3 employs a hybrid architecture, leveraging the strengths of both centralized and decentralized systems. The centralized server is responsible for managing user data, detailed event information, and conventional ticketing processes. This ensures efficient and reliable handling of essential app functionalities.

In tandem, Winee3 harnesses the power of the Ethereum blockchain for its NFT-based ticketing component. This integration brings several key advantages:

- **Transparency:** Blockchain's inherent transparency allows users to see the full history of each ticket, from creation to transfer, ensuring clarity and trust in the ticketing process.
- **Immutability:** Once a transaction is recorded on the blockchain, it cannot be altered or deleted. This feature is crucial for the authenticity and security of NFT tickets.
- **Digital Ownership:** NFTs provide a unique form of digital ownership, where each ticket is a distinct digital asset, enhancing its value beyond mere access to an event.

Interoperability: Utilizing Ethereum blockchain also opens possibilities for interoperability with other blockchain platforms and services, expanding the ecosystem in which Winee3 operates.

## Winee3's hybrid architecture

**User Interface**

**Branch Out**

**Traditional Ticketing**

- Event Search
- Ticket Purchase
- QR Generation

**NFT Ticketing Process**

- NFT Minting
- Digital Ownership Transfer
- Blockchain Verification
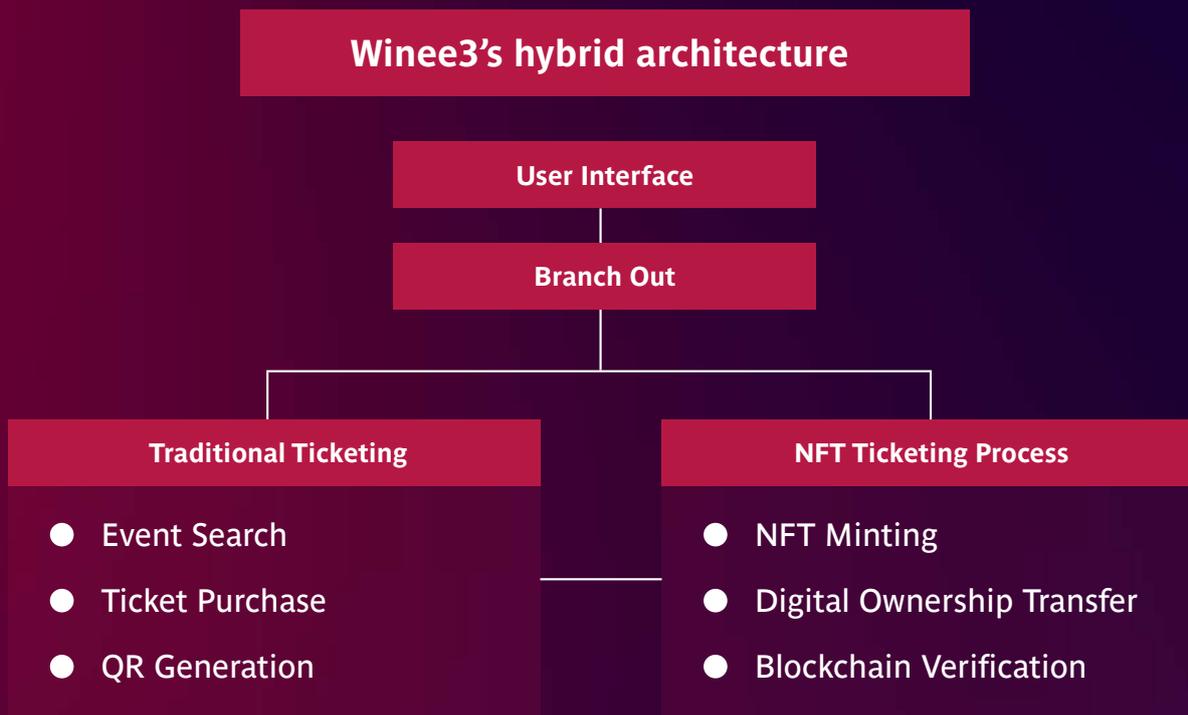

## 2   Smart Contracts for NFT Ticketing

Winee3 utilizes smart contracts on the Ethereum blockchain to manage the creation and distribution of event tickets. These contracts automate several key functions:

- **Ticket Minting:** Define the rules for issuing tickets as NFTs, including quantity, pricing, and special features.

- **Ownership Transfer:** Facilitate a secure and transparent transfer of ticket ownership upon purchase, recording each transaction on the blockchain.

- **Uniqueness and Verification:** Ensure that each NFT ticket is unique and verifiable, enhancing security and preventing duplication or forgery.

**Smart Contract**

**Minting**     **Ownership Transfer**     **Ticket Verification**

## 3   Secure Ticket Transfer Mechanism

**Traditional Tickets:** The centralized server system manages the transfer of traditional tickets, ensuring reliability and ease of use for users not engaged with NFTs.
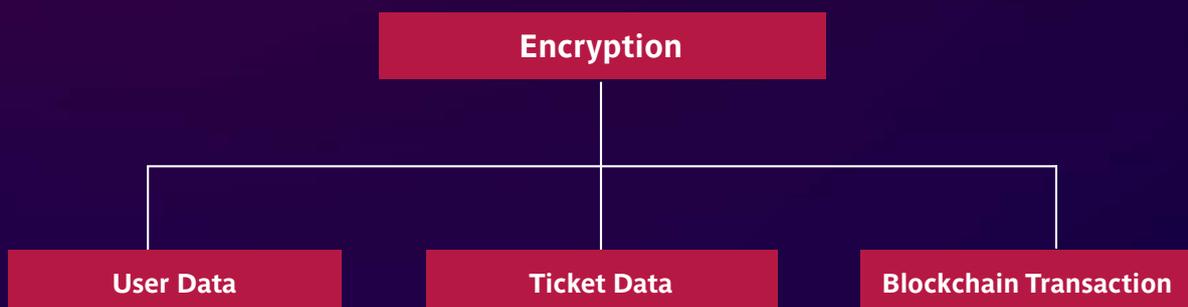

**NFT Tickets:** Blockchain technology handles the transfer of NFT tickets. This decentralized approach guarantees real-time updates of ownership, with the added security and transparency of blockchain ledger.

## 4   Encryption and Security

Data Protection: Utilizing state-of-the-art encryption standards, all user data and ticket information within the Winee3 system are securely encrypted.

Blockchain Security: The inherent security features of blockchain technology ensure that all NFT ticket transactions are tamper-proof and immutable, providing an additional layer of trust and reliability.

## How we verify NFT tickets in case they have been transferred or sold to another wallet?

One of the challenges of using NFTs for tickets is how to verify them in case they have been transferred or sold to another wallet, so there is no chance for several people to enter any event with one ticket. To solve this problem, we use a smart contract, which is a self-executing agreement that is written in code and deployed on the blockchain. A smart contract can enforce the rules and conditions of a transaction, such as the ownership, transfer, and verification of an NFT ticket.

When a user creates an event and sells their tickets as NFTs, they have to specify the details of the event, such as the name, date, time, location, and capacity, as well as the price and quantity of the tickets. These details are encoded in the smart contract, which also generates and assigns a unique ID and QR code for each ticket. The smart contract also keeps track of the current owner and status of each ticket, and allows the owner to transfer or sell their ticket to another user, as long as they comply with the terms and conditions of the contract.

When a user buys or receives a ticket as an NFT, they have to store it in their digital wallet, which is a secure application that allows them to manage their NFTs and other cryptocurrencies. The digital wallet also displays the details and QR code of the ticket, which the user has to show at the entrance of the event. The event organizer has to scan the QR code of the ticket with a special app that is connected to the smart contract. The app will verify the validity and ownership of the ticket, and update its status to "used" on the blockchain. This way, there is no chance for several people to enter any event with one ticket, as the smart contract will prevent any duplicate or fraudulent tickets from being verified.

By using smart contracts and NFTs, we can ensure that the tickets for the events in our app Winee3 are secure, verifiable, and transferable, and that the users can enjoy a smooth and hassle-free experience. We believe that this feature will create more value and trust for our users, and encourage them to explore and attend more events together, fostering a sense of community and shared interest.

# We are not limited to real life events

One of the features of our app Winee3 is that users can organize and sell tickets for their own events, whether they are real life or online events. Users can create events for various purposes, such as entertainment, education, networking, or dating, and they can choose the format, date, time, location, and capacity of their events. Users can also set the price and quantity of their tickets, and sell them as NFTs, which are secure, verifiable, and transferable digital assets.

Users who want to organize online events can use our app Winee3 to create and sell their tickets, and to host and manage their events. Users can choose from different types of online events, such as webinars, podcasts, live streams, or video chats, depending on their preferences and goals. Users can also use various platforms and tools to deliver their online events, such as Zoom, YouTube, Twitch, or Discord, as long as they provide the necessary links and instructions for their attendees. Users can also interact with their attendees through the app, by sending messages, feedback, or respect.

Users who want to attend online events can use our app Winee3 to browse and buy tickets for the events that interest them, and to join and enjoy them. Users can find online events by category, location, industry, or skill, and they can see the details and reviews of each event. Users can also see the profiles and messages of the organizers and other attendees, and they can connect and communicate with them. Users can also use their Winee Points to access premium features and benefits, such as advanced filters, reverse matches, or video calls.

By using our app Winee3, users can organize and attend online events with ease and convenience, and they can also create and foster a dynamic and interactive professional community. We believe that online events are not limited by physical boundaries, and that they can offer more opportunities and experiences for our users. We also believe that online events can complement and enhance real life events, and that they can create more value and trust for our users. Winee3 is your gateway to a world of unparalleled online events, where you can learn, network, and have fun with other like-minded and respectful professionals.

# Token Economics and Reward System

Winee3 introduces an innovative token revenue sharing model, offering incentives like airdrops to engage and reward users within the ecosystem. This system is designed to be fair and compliant with regulatory standards, ensuring equitable distribution based on user participation and investment in the platform. Moreover, the app includes a rewards system that encourages active participation, offering various benefits for different levels of user engagement, from attending events to engaging in peer-to-peer learning sessions.

Some of the benefits of this system are:

● **Value creation:** Winee3 creates value for its users by allowing them to earn tokens for their contributions and activities on the platform. Users can earn tokens by creating or joining groups, communities, or clubs, hosting or attending events, webinars, or workshops, posting or sharing job opportunities, recommending or endorsing contacts, creating or sharing content, products, or services, and providing feedback or suggestions. Users can also earn tokens by investing in the platform, such as buying, holding, or staking tokens, or participating in governance or decision-making processes.

● **Value exchange:** Winee3 enables value exchange for its users by allowing them to use tokens for various purposes and benefits on the platform. Users can use tokens to access exclusive opportunities, events, or platforms, to unlock premium features or services, to enhance their profiles or reputations, to increase their visibility or reach, to support or reward other users, or to donate or contribute to social causes. Users can also use tokens to trade or exchange with other users, or to convert to other currencies or assets.

● **Value appreciation:** Winee3 ensures value appreciation for its users by implementing a token revenue sharing model, which distributes a portion of the platform's revenue to the token holders, based on their participation and investment in the platform. Users can receive airdrops of tokens periodically, based on their activity and performance on the platform. Users can also benefit from the increase in the token price, as the demand and supply of the token are determined by the growth and success of the platform. Users can also benefit from the network effects, as the value of the token and the platform increases with the number and quality of the users and the interactions.

# Effortless Ticket Exchange

Winee3's user-friendly interface enables a straightforward ticket sharing process. By utilizing their unique user ID, which is a combination of letters and numbers that identifies each user in the app, individuals can swiftly send or receive event tickets with just a single click. The user ID can be found in the user's profile page, and can be copied and pasted into the ticket sharing feature. This hassle-free exchange not only removes the complexities often associated with ticket transfers, such as fees, verification, or compatibility issues, but also encourages users to explore and attend events together, fostering a sense of community and shared interest. Users can share tickets with their friends, family, colleagues, or even strangers who have similar tastes and preferences. Users can also browse and join events that other users have shared tickets for, and discover new and exciting opportunities for entertainment, education, or networking. Winee3's ticket sharing feature is designed to make event attendance more accessible, convenient, and enjoyable for its users, and to create a more vibrant and diverse professional community.

# Winee token ($WNE)

### Utility and Engagement in the Web3 World:

The Winee3 token ($WNE) serves as the cornerstone of the Winee3 super app, acting as a multi-functional utility token. Users can exchange $WNE for Winee Points, unlocking a variety of in-app features and transactions. Beyond simple transactions, the $WNE token is integral to Winee3's reward system, offering regular incentives that drive engagement and participation within the platform's Web3-oriented ecosystem.

### Connecting Through Web3: More Than Just Networking:

Winee3 transcends the typical bounds of digital interaction, fostering genuine professional connections through an array of Web3-enabled events. It provides a platform for users to engage with industry leaders, participate in knowledge-sharing sessions, and attend web3 and blockchain-focused gatherings. This approach encourages real-world networking while leveraging the potential of Web3 technologies.

### Winee3: A Super App Tailored for the Web3 Era:

Designed for enthusiasts of the Web3 space, Winee3 caters to a spectrum of users – from those exploring the world of blockchain and cryptocurrencies to seasoned professionals in the field. The app harmonizes the experience of professional networking, event participation, and the dynamic world of Web3, offering a unique, enriching journey for every user immersed in this innovative space.

The WNE Token in the Winee3 app offers a diverse range of utilities, enhancing both the functionality and the user experience:

### Convert to Winee Points

Users can exchange WNE tokens for Winee Points, which are used for various in-app activities.

### WineeDuo Staking

Allows users to stake their tokens to earn rewards, enhancing user engagement and investment in the platform.

### Community Rewards

Active participation in the community is rewarded with WNE tokens, incentivizing meaningful engagement.

### DAO Voting

WNE tokens enable users to participate in decentralized governance, giving them a say in important decisions.

### Event Creation

Users can utilize tokens to create events within the app, fostering community interaction.

### NFT Ticket Minting

Facilitates the creation of NFT tickets for events, adding a layer of security and uniqueness.

### Mint Winee ID NFTs

Users can mint their own Winee ID as NFTs, personalizing their digital identity on the platform.

Additionally, by converting WNE tokens into Winee Points, users gain access to a variety of in-app utilities:

### Subscription Packages

Access to premium features and exclusive content.

### In-App Advertisements

Utilize points to advertise within the app.

### Swipe Privileges

Enhanced user experience in profile browsing.

### Respect Feature

Special feature to acknowledge or appreciate other users.

### Super-Like Feature

A way to express high interest in other profiles.

### Job Search Feature

Access to job listings and career opportunities.

### Education Feature

Engage in educational content and resources.

These utilities make the WNE Token a versatile and valuable asset within the Winee3 ecosystem, catering to a wide range of user needs and preferences.

# Tokenomics

$WNE is strategically developed with a fixed total supply of 9 billion tokens, anchoring its value in a market without inflation or deflation pressures. The token's design emphasizes broad compatibility and flexibility, facilitating its easy transfer, exchange, and secure storage across various digital wallets and platforms in the cryptocurrency  ecosystem.

The detailed distribution of $WNE is outlined in the chart that follows, providing an insightful breakdown of its allocation and circulation within our platform, ensuring transparency and understanding for all users.

# Integrated Self-Custody Web3 Wallet in Winee3

### Seamless Integration for Enhanced Security and Flexibility:

Winee3 introduces an innovative feature for its users – a self-custody Web3 wallet integrated directly within the app. This wallet is designed to give users complete control over their digital assets, including the ability to securely store, manage, and use their $WNE tokens and other cryptocurrencies.

### Activation and Key Management:

Users can activate their Web3 wallet within the Winee3 app with just a few simple steps. Upon activation, the user is provided with secure keys – the essential tools for accessing and managing their wallet.

These keys are entirely under the user's control, emphasizing the importance of self-custody and the security it brings.

### Utility and Convenience:

The wallet allows users to store their $WNE tokens securely within the app. This integration means users can easily access and use their tokens for various in-app transactions, such as purchasing premium features or participating in staking programs.

Beyond storing $WNE tokens, the wallet functions similarly to other crypto wallets, enabling users to manage a variety of cryptocurrencies. This flexibility makes it a versatile tool for both novice and experienced users in the crypto space.

## Empowering Users with Control and Security:

By offering a self-custody wallet, Winee3 empowers its users with complete control over their digital assets. This approach aligns with the ethos of decentralization and user empowerment that is central to the Web3 philosophy.

The integration of this wallet within Winee3 simplifies the user experience, allowing for seamless management of digital assets while engaging with the app's networking and event features.

The integration of a self-custody Web3 wallet within Winee3 reflects our commitment to providing a secure, user-friendly, and versatile platform. It ensures that users have a convenient and safe way to manage their digital assets, aligning with the evolving needs of the modern Web3 user.
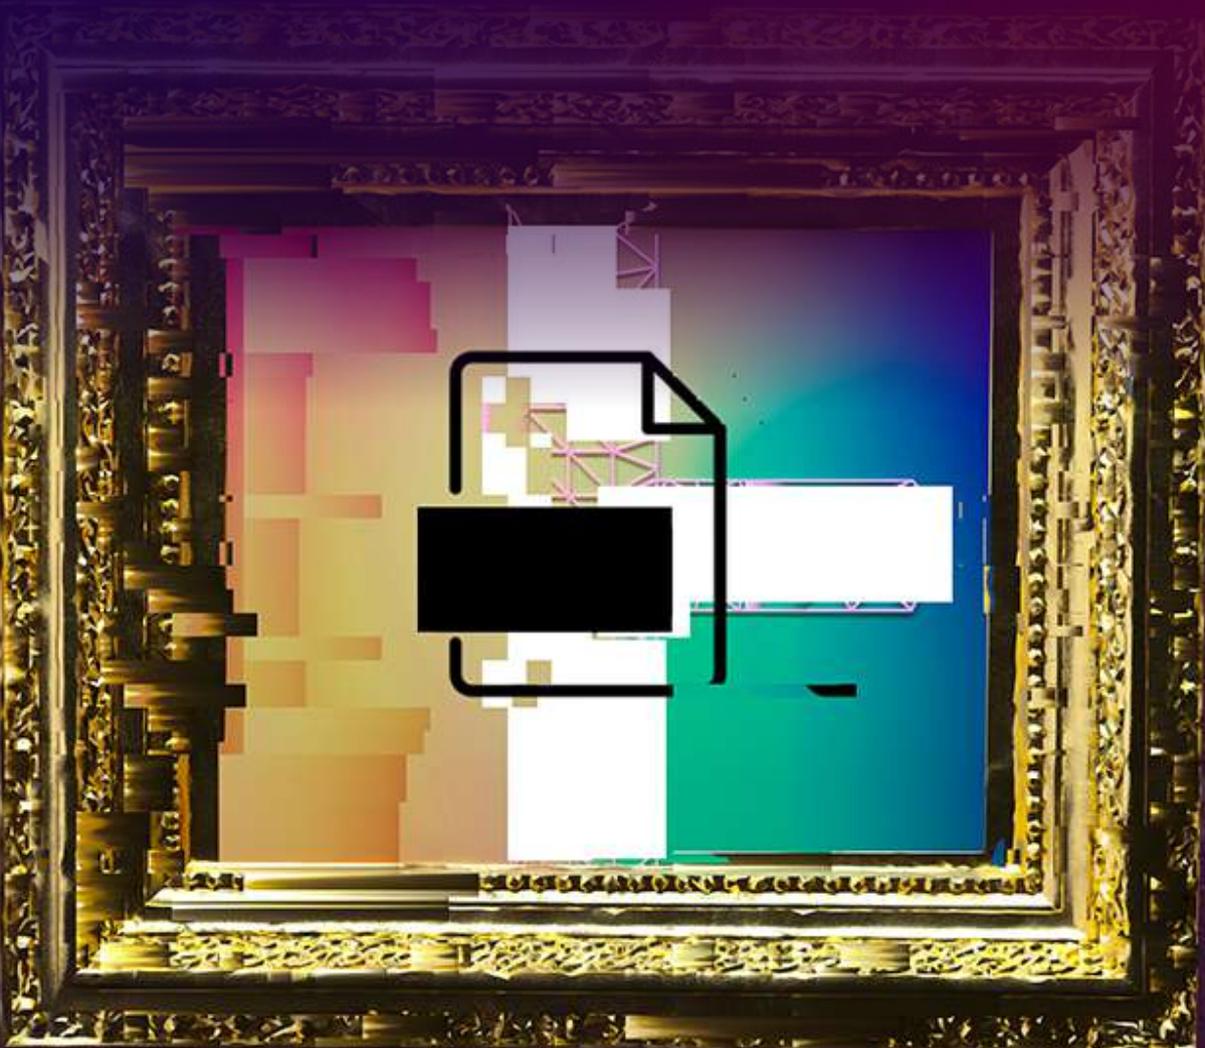

## WineeDuo Staking

### A Brief Overview
Winee presents its distinctive staking system: "WineeDuo Staking." Through this, $WNE token holders can stake their tokens and, in return, earn both passive token rewards and Winee Points — the exclusive in-app currency. The potential earnings are shaped by blockchain-specific factors (such as the number of blocks and the staked amount) coupled with the user's engagement level on the Winee app.

### Token Rewards from Staking
**Formula:**

$$\text{Base Reward} = \left( \frac{\text{User's \$WNE staked}}{\text{Total \$WNE staked by all users}} \right) \times \begin{array}{c} \text{Token} \\ \text{rewards} \\ \text{per block} \end{array} \times \begin{array}{c} \text{Number of} \\ \text{blocks since} \\ \text{last claim} \end{array}$$

## Earning Winee Points from Staking

### 1    Bonus for Staking $WNE

Stakers of $WNE tokens benefit twofold: they gain passive token income and accumulate Winee Points (WP). These points can be redeemed for in-app purchases and enable access to special features within the app.

When you stake, the accrued $WNE passive income and Winee Points are directly credited to the Winee App without any further actions required on your end.

## 2    Bonus for App Engagement and Winee ID Ownership

Active users of the Winee app stand to earn bonus rewards. This engagement is quantified by various activities like event participation, usage of the dating module, among others. Moreover, owners of the Winee ID (an ERC-721 token) experience an enhanced reward, a nod to their unique involvement and dedication to the Winee Ecosystem.

**Formula:**

$$\text{Winee Point Reward} = \text{Base Reward} + (\text{Daily Active Usage} \times \text{Engagement Multiplier}) + (\text{Winee ID Ownership} \times \text{Winee ID Multiplier})$$

**Where:**

**Base Reward** corresponds to the fundamental staking reward, determined by a user's relative contribution to the staking pool.

**Daily Active Usage** assesses the frequency and intensity of a user's engagement with the Winee app.

**Engagement Multiplier** is a coefficient that intensifies rewards based on user activity.

**Winee ID Ownership** adopts a binary value: 0 denotes non-ownership, and 1 signifies ownership.

**Winee ID Multiplier** is a coefficient that magnifies rewards exclusively for Winee ID holders.

The framework Winee adopts seeks to gratify both the $WNE token stakers—those who bolster the network—and the active users of the Winee app. By amalgamating blockchain mechanics with in-app actions, a holistic approach to participant incentivization is achieved, fostering a vibrant ecosystem.

# Winee3 App Income Model

## 1    Package Sales via App Stores

**Description:** Winee3 enhances user experience through a variety of premium packages. These packages, offering exclusive features and additional benefits, are readily available for purchase in app stores like Apple Store and Google Play.

### Revenue Stream:

- Income from initial package purchases.
- Ongoing revenue through subscription renewals, where applicable.
- Additional income from in-app upgrades and unlocking of extra features.

### Factors Influencing Revenue:

- The visibility and ranking of Winee3 in app stores, which drive organic discovery.
- User reviews and ratings, crucial for building trust and credibility.
- Regular updates and the addition of new features to keep the app fresh and engaging.
- Targeted marketing campaigns to promote premium packages.
- Active engagement with the crypto community on social platforms, leveraging the interest in blockchain and Web3.
- Innovative and unique marketing strategies that create buzz and set Winee3 apart from its competitors.

## 2   $WNE Token Exchange for App Points

**Description:** Users can exchange $WNE tokens for application points on the Winee3 website. These application points can be used within the app for various privileges and features.

### Revenue Stream:

- Commission or fee from each $WNE token exchange
- Direct purchase of application points using wine tokens

### Factors Influencing Revenue:

- Value and demand for $WNE tokens in the market
- Utility and appeal of application points within the app
- Exchange rates and incentives offered

## 3    Event Ticket Sales (Credit Card Payments)

**Description:** Winee3 facilitates the sale of event tickets, allowing users to purchase access to various events using their credit cards.

### Revenue Stream:

- Percentage commission from each ticket sale
- Fixed booking fee per ticket
- Premium ticket sales offering additional benefits

### Factors Influencing Revenue:

- Number and popularity of events hosted on Winee
- Exclusivity and demand for the events
- Ticket pricing strategy and discount offers

## 4   Event Ticket Sales (Crypto Payments)

**Description:** In addition to traditional payment methods, Winee provides an option for users to purchase event tickets using cryptocurrency.

## Revenue Stream:

- Percentage commission from each event ticket sale made via cryptocurrency payments
- Premium ticket sales with exclusive crypto-related benefits

## Factors Influencing Revenue:

- Cryptocurrency market trends and user adoption
- Security and ease of crypto transactions on Winee
- Integration with popular and widely accepted cryptocurrencies

## Additional Considerations:

1- Marketing and Promotion: The success of each revenue model might depend on effective marketing strategies. Collaborations, partnerships, and targeted advertising can enhance the reach and adoption of Winee's offerings.

2- User Experience: Seamless user experience, regular feature updates, and responsive customer support can contribute to increased sales and user retention.

3- Security: Especially for crypto payments ensuring top-notch security protocols will instill trust among users and foster more transactions.

4- Feedback and Iteration: Regularly collecting feedback from users and iterating on the app's offerings can keep Winee3 relevant and in-demand in a competitive market.

# Roadmap

## Phase 01

Conducts market and competitor research

Initiates project planning

Releases a draft project blueprint

Finalizes the developer team

Prepares lists of potential investors and partners

Begins the core app development

Plans crypto and NFT infrastructure integration

Engages with legal advisors for regulatory insights

Starts backend and service development

Continues app development

## Phase 02

Whitepaper Concept Defined

Crafts tokenomics and drafts the whitepaper

Starts community building with pre-marketing activities

Continues backend and service development

Continues app development

IDO preparation

Launches an ambassador & referral program

Active Community Expansion

Community growth

Significant Growth in User Base

## Phase 03

Formed Strategic Partnerships

Private investment round

Seed round closed

~~MVP App development for IOS & Android~~

~~Launchpads secured~~

TGE date announced

Token giveaway

IDO Successfully Rolled Out

Alpha Version Unveiled

TGE & DEX listings

## Phase 04

Public Beta Version Unveiled

Networking Beta Release

Event NFT Ticketing Beta Release

In-app Blockchain Features Release

Leaderboard Feature Release

Start the WineeDuo Staking

Announce Collaborations and Partnerships

Create Tutorial Content for App Navigation

Integrate Crypto Payment Gateways into the App

Discuss Potential Listings with CEX Platforms

## Phase 05

Launches the app to the public

Corporate account function release

Voice group chat function release

Video group chat function release

Book a meeting function release

Education function release

Job search & finding function release

Winee3 Wallet release

Release of new complete-to-earn missions

Aggressive KOLs and Marketing campaigns

# LEGAL DISCLAIMER

PLEASE READ THE ENTIRETY OF THIS "LEGAL DISCLAIMER" SECTION CAREFULLY. NOTHING HEREIN CONSTITUTES LEGAL, FINANCIAL, BUSINESS OR TAX ADVICE AND YOU SHOULD CONSULT YOUR OWN LEGAL, FINANCIAL, TAX OR OTHER PROFESSIONAL ADVISOR(S) BEFORE ENGAGING IN ANY ACTIVITY IN CONNECTION HEREWITH. NEITHER WINEE CO. (THE COMPANY), ANY OF THE PROJECT TEAM MEMBERS (THE WINEE TEAM) WHO HAVE WORKED ON WINEE3.IO (AS DEFINED HEREIN) OR PROJECT TO DEVELOP WINEE3.IO IN ANY WAY WHATSOEVER, ANY DISTRIBUTOR/VENDOR OF WNE TOKENS (THE DISTRIBUTOR), NOR ANY SERVICE PROVIDER SHALL BE LIABLE FOR ANY KIND OF DIRECT OR INDIRECT DAMAGE OR LOSS WHATSOEVER WHICH YOU MAY SUFFER IN CONNECTION WITH ACCESSING THIS WHITEPAPER, THE WEBSITE AT HTTPS://WINEE3.IO/ (THE WEBSITE) OR ANY OTHER WEBSITES OR MATERIALS PUBLISHED BY THE COMPANY.

**Project purpose:** You agree that you are acquiring WNE to participate in Winee3.io and to obtain services on the ecosystem thereon. The Company, the Distributor and their respective affiliates would develop and contribute to the underlying source code for Winee3.io. The Company is acting solely as an arms' length third party in relation to the WNE distribution, and not in the capacity as a financial advisor or fiduciary of any person with regard to the distribution of WNE.

**Nature of the Whitepaper:** The Whitepaper and the Website are intended for general informational purposes only and do not constitute a prospectus, an offer document, an offer of securities, a solicitation for investment, or any offer to sell any product, item, or asset (whether digital or otherwise). The information herein may not be exhaustive and does not imply any element of a contractual relationship. There is no assurance as to the accuracy or completeness of such information and no representation, warranty or undertaking is or purported to be provided as to the accuracy or completeness of such information. Where the Whitepaper or the Website includes information that has been obtained from third party sources, the Company, the Distributor, their respective affiliates and/or the Winee team have not independently verified the accuracy or completeness of such information. Further, you acknowledge that circumstances may change and that the Whitepaper or the Website may become outdated as a result; and neither the Company nor the Distributor is under any obligation to update or correct this document in connection therewith.

**Token Documentation:** Nothing in the Whitepaper or the Website constitutes any offer by the Company, the Distributor, or the Winee team to sell any WNE (as defined herein) nor shall it or any part of it nor the fact of its presentation form the basis of, or be relied upon in connection with, any contract or investment decision. Nothing contained in the Whitepaper or the Website is or may be relied upon as a promise, representation or undertaking as to the future performance of Winee3.io. The agreement between the Distributor (or any third party) and you, in relation to any distribution or transfer of WNE, is to be governed only by the separate terms and conditions of such agreement.

The information set out in the Whitepaper and the Website is for community discussion only and is not legally binding. No person is bound to enter into any contract or binding legal commitment in relation to the acquisition of WNE, and no digital asset or other form of payment is to be accepted on the basis of the Whitepaper or the Website. The agreement for distribution of WNE and/or continued holding of WNE shall be governed by a separate set of Terms and Conditions or Token Distribution Agreement (as the case may be) setting out the terms of such distribution and/or continued holding of WNE (the Terms and Conditions), which shall be separately provided to you or made available on the Website. The Terms and Conditions must be read together with the Whitepaper. In the event of any inconsistencies between the Terms and Conditions and the Whitepaper or the Website, the Terms and Conditions shall prevail.

**Deemed Representations and Warranties:** By accessing the Whitepaper or the Website (or any part thereof), you shall be deemed to represent and warrant to the Company, the Distributor, their respective affiliates, and the Winee team as follows:

a) in any decision to acquire any WNE, you have shall not rely on any statement set out in the Whitepaper or the Website;

b) you will and shall at your own expense ensure compliance with all laws, regulatory requirements and restrictions applicable to you (as the case may be);

c) you acknowledge, understand and agree that WNE may have no value, there is no guarantee or representation of value or liquidity for WNE, and WNE is not an investment product nor is it intended for any speculative investment whatsoever;

d) none of the Company, the Distributor, their respective affiliates, and/or the Winee team members shall be responsible for or liable for the value of WNE, the transferability and/or liquidity of WNE and/or the availability of any market for WNE through third parties or otherwise; and

e) you acknowledge, understand and agree that you are not eligible to participate in the distribution of WNE if you are a citizen, national, resident (tax or otherwise), domiciliary and/or green card holder of a geographic area or country (i) where it is likely that the distribution of WNE would be construed as the sale of a security (howsoever named), financial service or investment product and/or (ii) where participation in token distributions is prohibited by applicable law, decree, regulation, treaty, or administrative act (including without limitation the United States of America, Canada, and the People's Republic of China); and to this effect you agree to provide all such identity verification document when requested in order for the relevant checks to be carried out.

The Company, the Distributor and the Winee team do not and do not purport to make, and hereby disclaims, all representations, warranties or undertaking to any entity or person (including without limitation warranties as to the accuracy, completeness, timeliness, or reliability of the contents of the Whitepaper or the Website, or any other materials published by the Company or the Distributor). To the maximum extent permitted by law, the Company, the Distributor, their respective affiliates and service providers shall not be liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including, without limitation, any liability arising from default or negligence on the part of any of them, or any loss of revenue, income or profits, and loss of use or data) arising from the use of the Whitepaper or the Website, or any other materials published, or its contents (including without limitation any errors or omissions) or otherwise arising in connection with the same. Prospective acquirors of WNE should carefully consider and evaluate all risks and uncertainties (including financial and legal risks and uncertainties) associated with the distribution of WNE, the Company, the Distributor and the Winee team.

**WNE Token:** WNE are designed to be utilised, and that is the goal of the WNE distribution. In particular, it is highlighted that WNE:

a) does not have any tangible or physical manifestation, and does not have any intrinsic value (nor does any person make any representation or give any commitment as to its value);

b) is non-refundable and cannot be exchanged for cash (or its equivalent value in any other digital asset) or any payment obligation by the Company, the Distributor or any of their respective affiliates;

c) does not represent or confer on the token holder any right of any form with respect to the Company, the Distributor (or any of their respective affiliates), or its revenues or assets, including without limitation any right to receive future dividends, revenue, shares, ownership right or stake, share or security, any voting, distribution, redemption, liquidation, proprietary (including all forms of intellectual property or licence rights), right to receive accounts, financial statements or other financial data, the right to requisition or participate in shareholder meetings, the right to nominate a director, or other financial or legal rights or equivalent rights, or intellectual property rights or any other form of participation in or relating to Winee3.io, the Company, the Distributor and/or their service providers;

d) is not intended to represent any rights under a contract for differences or under any other contract the purpose or pretended purpose of which is to secure a profit or avoid a loss;

e) is not intended to be a representation of money (including electronic money), security, commodity, bond, debt instrument, unit in a collective investment scheme or any other kind of financial instrument or investment;

f) is not a loan to the Company, the Distributor or any of their respective affiliates, is not intended to represent a debt owed by the Company, the Distributor or any of their respective affiliates, and there is no expectation of profit; and

g) does not provide the token holder with any ownership or other interest in the Company, the Distributor or any of their respective affiliates.

Notwithstanding the WNE distribution, users have no economic or legal right over or beneficial interest in the assets of the Company, the Distributor, or any of their affiliates after the token distribution.

To the extent a secondary market or exchange for trading WNE does develop, it would be run and operated wholly independently of the Company, the Distributor, the distribution of WNE and Winee3.io. Neither the Company nor the Distributor will create such secondary markets nor will either entity act as an exchange for WNE.

**Informational purposes only:** The information set out herein is only conceptual, and describes the future development goals for Winee3.io to be developed. In particular, the project roadmap in the Whitepaper is being shared in order to outline some of the plans of the Winee team, and is provided solely for INFORMATIONAL PURPOSES and does not constitute any binding commitment. Please do not rely on this information in deciding whether to participate in the token distribution because ultimately, the development, release, and timing of any products, features or functionality remains at the sole discretion of the Company, the Distributor or their respective affiliates, and is subject to change. Further, the Whitepaper or the Website may be amended or replaced from time to time. There are no obligations to update the Whitepaper or the Website, or to provide recipients with access to any information beyond what is provided herein.

**Regulatory approval:** No regulatory authority has examined or approved, whether formally or informally, any of the information set out in the Whitepaper or the Website. No such action or assurance has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of the Whitepaper or the Website does not imply that the applicable laws, regulatory requirements or rules have been complied with.

**Cautionary Note on forward-looking statements**: All statements contained herein, statements made in press releases or in any place accessible by the public and oral statements that may be made by the Company, the Distributor and/or the Winee team, may constitute forward-looking statements (including statements regarding the intent, belief or current expectations with respect to market conditions, business strategy and plans, financial condition, specific provisions and risk management practices). You are cautioned not to place undue reliance on these forward-looking statements given that these statements involve known and unknown

risks, uncertainties and other factors that may cause the actual future results to be materially different from that described by such forward-looking statements, and no independent third party has reviewed the reasonableness of any such statements or assumptions. These forward-looking statements are applicable only as of the date indicated in the Whitepaper, and the Company, the Distributor as well as the Winee team expressly disclaim any responsibility (whether express or implied) to release any revisions to these forward-looking statements to reflect events after such date.

**References to companies and platforms:** The use of any company and/or platform names or trademarks herein (save for those which relate to the Company, the Distributor or their respective affiliates) does not imply any affiliation with, or endorsement by, any third party. References in the Whitepaper or the Website to specific companies and platforms are for illustrative purposes only.

**English language:** The Whitepaper and the Website may be translated into a language other than English for reference purpose only and in the event of conflict or ambiguity between the English language version and translated versions of the Whitepaper or the Website, the English language versions shall prevail. You acknowledge that you have read and understood the English language version of the Whitepaper and the Website.

**No Distribution:** No part of the Whitepaper or the Website is to be copied, reproduced, distributed or disseminated in any way without the prior written consent of the Company or the Distributor. By attending any presentation on this Whitepaper or by accepting any hard or soft copy of the Whitepaper, you agree to be bound by the foregoing limitations.

# RISK WARNING

Winee3.io is currently in the initial development stages and there are a variety of unforeseeable risks. You acknowledge and agree that there are numerous risks associated with acquiring WNE, holding WNE, and using WNE for participation in Winee3.io. In the worst scenario, this could lead to the loss of all or part of WNE held. **IF YOU DECIDE TO ACQUIRE WNE OR PARTICIPATE IN WINEE3.IO, YOU EXPRESSLY ACKNOWLEDGE, ACCEPT AND ASSUME THE FOLLOWING RISKS:**

● Uncertain Regulations and Enforcement Actions: The regulatory status of Winee3.io, WNE and distributed ledger technology is unclear or unsettled in many jurisdictions. The regulation of digital assets has become a primary target of regulation in all major countries in the world. It is impossible to predict how, when or whether regulatory agencies may apply existing regulations or create new regulations with respect to such technology and its applications, including WNE and/or Winee3.io. Regulatory actions could negatively impact WNE and/or Winee3.io in various ways. The Company, the Distributor (or their respective affiliates) may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction. After consulting with a wide range of legal advisors to mitigate the legal risks as much as possible, the Company and Distributor have worked with the specialist blockchain department at with contracted law firms and obtained a legal opinion on the token distribution, and will be conducting business in accordance with the prevailing market practice.

● Inadequate disclosure of information: As at the date hereof, Winee3.io is still under development and its design concepts, consensus mechanisms, algorithms, codes, and other technical details and parameters may be constantly and frequently updated and changed. Although this whitepaper contains the most current information relating to Winee3.io, it is not absolutely complete and may still be adjusted and updated by the Winee team from time to time. The Winee team has neither the ability nor obligation to keep holders of WNE informed of every detail (including development progress and expected milestones) regarding the project to develop Winee3.io, hence insufficient information disclosure is inevitable and reasonable.

- Failure to develop: There is the risk that the development of Winee3.io will not be executed or implemented as planned, for a variety of reasons, including without limitation the event of a decline in the prices of any digital asset, virtual currency or WNE, unforeseen technical difficulties, and shortage of development funds for activities.

- Security weaknesses: Hackers or other malicious groups or organisations may attempt to interfere with WNE and/or Winee3.io in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing and spoofing. Furthermore, there is a risk that a third party or a member of the Company, the Distributor or their respective affiliates may intentionally or unintentionally introduce weaknesses into the core infrastructure of WNE and/or Winee3.io, which could negatively affect WNE and/or Winee3.io. Further, the future of cryptography and security innovations are highly unpredictable and advances in cryptography, or technical advances (including without limitation development of quantum computing), could present unknown risks to WNE and/or Winee3.io by rendering ineffective the cryptographic consensus mechanism that underpins that blockchain protocol.

- Other risks: In addition, the potential risks briefly mentioned above are not exhaustive and there are other risks (as more particularly set out in the Terms and Conditions) associated with your participation in Winee3.io, as well as acquisition of, holding and use of WNE, including those that the Company or the Distributor cannot anticipate. Such risks may further materialise as unanticipated variations or combinations of the aforementioned risks. You should conduct full due diligence on the Company, the Distributor, their respective affiliates, and the Winee team, as well as understand the overall framework, mission and vision for Winee prior to participating in the same and/or acquiring WNE.
